

Responding to the consultation

The following survey contains 5 questions. Questions 1 to 4 seek feedback on specific changes outlined for Radioactive Substance Activity charges in the consultation document. Question 5 asks for more general feedback on these developments of the Charging Scheme. We have asked for responses to all questions, though you may choose to leave a null response if you do not think it is relevant.

Privacy Policy

Any personal data collected through this website will be used solely for the purpose of conducting a public consultation into the proposed amendment to Environmental Regulation (Scotland) Charging Scheme 2018 and will not be passed onto third parties without express permission. Personal data may be shared with Scottish Government for the purposes of assessing the outcomes of the consultation.

Respondents are asked for their name, contact details and organisation (if applicable). Collecting this personal data will allow SEPA to adequately deal with submissions. If respondents choose not to supply contact details SEPA will not be able to contact them in order to clarify their response or to answer any questions raised, which may, in cases where required clarification cannot be obtained, lead to their response being discounted for the purposes of the consultation. Personal details will not be published or shared outside relevant teams within SEPA and Scottish Government without the respondent's express permission, in accordance with the principles of the Data Protection Act 2018.

SEPA is required to consult under Environment Act 1995 and this is the reason for the consultation and seeking views. SEPA's Privacy Policy web page is here ([link](#)).

Publication of Responses

As part of the public consultation process SEPA will publish consultation responses and results. In the following section respondents are asked whether they agree for their responses, name and address to be made available to the public; this section can be used to request full or partial confidentiality. Confidentiality can be requested at a later date by contacting charging@sepa.org.uk.
