Making changes to a licence

Variations

Use this form if you are the responsible person specified in a licence and you wish to apply for:

An administrative variation to your licence:

An “administrative” variation involves changes which will not have any environmental impact or which reduce the impact of the activity. (N.B. If you are actually ceasing one of multiple controlled activities covered by your licence, and want to remove it from the licence, you will need to apply for a partial surrender of the licence, using application form I). An application for administrative variation can cover changes to part or all of the licence.

Administrative Variations relating to Licenced Mobile Abstraction Plant Activities:

If an abstraction is carried out using mobile plant authorised under an existing licence, then the addition of each new point of abstraction to that licence will be considered as an administrative variation.

A technical variation to your licence:

A “technical” variation involves any change to a licence which will increase the impact/risk to the environment and requires SEPA to carry out an environmental assessment of the proposed changes. Examples include increasing a volume abstracted, increasing the volume and/or nature of a discharge and adding a new controlled activity to the licence. The fee payable is based on the number of activities which are affected by such technical changes and the level of authorisation of that activity (i.e. simple or complex licence).

Each application form can only be used for variations to a single licence. If you want to request variations to other licences, please use a separate form for each licence.

For further information on the application fees payable, see the *Water Regulation > Charging Scheme guidance* (http://www.sepa.org.uk/water/water_regulation/charging_scheme.aspx) on the SEPA website or contact your local SEPA office (see http://www.sepa.org.uk/about_us/contacting_sepa/office_locations.aspx for details)

Transfer

Application form H should be used for any application to transfer a licence in whole or in part to a different responsible person.

Surrender

Application form I should be used for any application to surrender a licence in whole or in part.

Who signs the application?

If you are making an application on your own behalf and you are the Responsible Person, then you should sign the application form. If the application is being made on behalf of a company, partnership or other organisation which is the “Responsible Person”, then the person who signs the declaration at the end of the form should have the authority to sign the application on behalf of that organisation.

For more guidance on ‘Responsible Person’ please see the “Guide for Applicants”.

Where to send your application

See details on page 11 of this form.

What happens when we get your application?

We will check through the application to make sure that it is complete and that SEPA has all the information it requires.

We may contact you for further information and depending on the type of variation being requested, this may be via telephone, letter or in some cases a formal notice.

In cases where further relevant information has to be gathered before a decision can be made on an

application, there may be an additional charge, to cover the cost of SEPA acquiring the information but this will always be subject to prior agreement.

Poor quality information may result in your application being delayed.

Processing your application for variation

SEPA has to process applications for variation of a licence within 4 months. This period will be extended if SEPA needs to contact you for further information. It may also be extended for other reasons, but only with your written agreement.

Disclosure of the information you give us in your application

SEPA may have to consult interested third parties about your application. SEPA will require any application for significant changes to be advertised in the press, at your expense (See further guidance on consultation and advertising).

Please read the data protection notice on the front page of this form which explains how we will use information given to us.

SEPA’s full service charter may be viewed from the SEPA web site www.SEPA.org.uk

3. ADMINISTRATIVE VARIATION

Complete this section if you are applying for an administrative variation.

3.1 Type of Change:

Please indicate below what type(s) of change you are applying for and if necessary provide details of the proposed changes on a separate sheet of paper and attach it to this application.

Reference number of supporting document:

[REDACTED]

3.1.1 Are you applying to:

- change a condition(s) of the licence which reduces environmental risk e.g. reduction in abstraction volume, higher quality discharge effluent etc.?
- add a new abstraction point(s) to a licenced mobile abstraction plant activity?
- other changes? (e.g. changes which do not require SEPA to undertake an environmental assessment). Please specify briefly in the box below and continue on a separate sheet if necessary

Seaforth and Noster Salmon Farms are managed together. Cumulative modelling of simultaneous treatments at the two sites (4 treatment releases per day) demonstrated that environmental quality standards were still comfortably met.

A third site with consent to discharge azamethiphos is located at Trilleachan Mor. Cumulative modelling of coincident treatments at all three sites (up to 5 releases per day) revealed the potential for an EQS breach at spring tides. Reducing the treatment schedule at Seaforth and Noster, such that only 2 pens per day were treated (at either Seaforth or Noster, or one pen at each) together with the daily treatments at Trilleachan Mor, successfully met the MAC and EQS conditions.

It should be noted that this treatment regime, 18 pens treated in 8 consecutive days, is extremely intensive and is unlikely to occur in reality. We can be confident that more realistic treatment regimes, provided that no more than 3 pens are treated in the whole loch system per day, will not breach environmental quality standards.

3.2 Details of Administrative Variations applied for:

Schedule / Conditions for authorised activity	Brief details of Administrative Variations applied for:

The changes proposed should also take account of the principles of efficient and sustainable water use.

4.1.1 Are you applying to:

vary an existing condition of a licence and/or significantly change operational practices e.g. increase the volume of abstraction; change the times of year the abstraction is made; increase the discharged volume or change the nature of the discharge etc.?

add a new controlled activity or activities to your licence?:

- new discharge: *also complete Form B*
