

## 1 NON TECHNICAL SUMMARY OF DETERMINATION

Petroineos have requested a change to their operating Permit as follows:

### **Extension to Sulphur Derogation Timeline of Seven Months**

The delayed installation of a Sulphur scrubber on the fuel gas system will result in the emission of an estimated maximum additional 100 Tonnes of Sulphur.

SEPA has assessed the request and is minded to approve it due to the technical reasons presented and the context of a much-reduced site-wide Sulphur emission since the original derogation was determined. The worst case additional emission over a seven month period equates to roughly two weeks of daily emissions in 2019 prior to Site restructuring. The daily emission is at around 25% of this level today.

### **Housekeeping of permit**

Updates to remove time expired conditions and minor errors.
