

Shetland Islands Council operate a landfill and civic amenities facilities from a site at Gremista outside Lerwick. The site has a permit to operate from the Scottish Environment Protection Agency (SEPA) . Currently the permit covers the operation of the landfill but not the additional activities carried out on the site. The Council have applied to SEPA to vary the permit to incorporate the operation of a household waste recycling centre and waste transfer and treatment (bailing and shredding) areas as directly associated activities (DAA's).
