DNSR RESPONSE TO SEPA CONSULTATION OF HMNB CLYDE APPLICATION FOR DISCHARGE OF RADIOACTIVE SUBSTANCES

Isabelle,

Thank you for your letter¹ received 2nd July 2019 and the opportunity to engage with the consultation. I have reviewed HMNB Clydes's application² attached in your letter and I offer no objection.

I welcome the intent to combine four existing approvals into a single approval that meets the future programme requirements. I am content with HMNB Clyde's description of their work and planned work. I have no MOD Authorisation compliance issues that need to be factored into this consultation; compliance to the limits described within Para 3.8.3 of HMNB Clyde's application is being monitored through routine dialogue with the Site's Radiological Protection Advisors.

Should you require additional input to the SEPA consultation from MOD, please do not hesitate to contact me.

Kind regards

Signed on Original

Doug Black
DNSR Principal Inspector
